

**Use:** The rudder blade helps you keep your kayak on a straight course more easily. It is particularly suitable for beginners or when using the kayak on open water.

**WARNING**

Kindly take extra care when putting out from the shallows and when landing, since the fin may catch on the bottom thereby itself suffering damage, alternatively thereby causing damage to the kayak itself. Do not store or pack kayaks with Tracking fins mounted.

- Assembly:** Always assemble the rudder blade on a deflated kayak. Follow the instructions in the pictures.
- Material:** The rudder blade is made from polyamide (PAD).
- Storage:** Store the rudder blade in a dry and clean place away from sources of radiant heat.
- Product Disposal Method:** The product should be disposed of at municipal waste disposal sites or by recycling.
- Packaging Disposal Method:** PE plastic wrap (low-density branched polyethylene) – recycle as indicated by the symbol.
